ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: A DEVICE FOR PREVENTING AXIAL MOVEMENT

(57) Abstract: A device for preventing axial movement of an elongated member (1) applied through the skin of a mammal at a puncturing position comprises a plaster (2) designed to cover the surface around the puncturing position and having at least an adhesive layer (4) for securing it to the skin as well as an opening (9) through the layer(-s) thereof for the passage of said elongated member therethrough. The device also comprises means (8) secured to plaster and adapted to clamp around the elongated member when the elongated member is applied through the skin and the plaster is applied on the surface around said puncturing position. The clamping means is thin and substantially flat.
